

Vertical Stack System for emergency vehicles

Exhaust extraction systems for emergency vehicles

1. ALU 250 Rail
2. Sliding suspension
3. Funnel
4. Connection kit to duct system
5. Stack adaptor

Vertical Stack is a fully automatic exhaust extraction system for vehicles with top exhaust pipes. The vehicle either drives backwards into the parking bay or drives through. The extraction unit is designed as a rail with a funnel in one or both ends. The funnel guides a stack adaptor, mounted on the exhaust pipe, into the rail. The sliding suspension provides automatic sideways positioning of the rail.

- **Capacity – one vehicle per system.**
- **Normal exit speed: up to 10 km/h, 5 mph.**
- **For existing or new fire stations.**
- **For back in or drive through vehicles.**
- **Optional automatic start/stop device that offers:**
 - Practical control of fan start/stop.
 - Safe control of air quality (source ventilation automatically starts when vehicle engine starts).
 - Simple programming.

Product name	Vertical Stack System for emergency vehicles

Vertical Stack System for emergency vehicles

[image]	Description	[model]
	Connection piece ALU150 kit	20373413
	Connection piece ALU250 kit	20373414
	Sliding suspension kit (one for every 2,5m needed)	20815264
	Funnel inlet/outlet kit ALU 250	20816164
	Funnel ALU 250	20815364
	End connection ALU150 w hose Ø200/0,66m	20816264
	End connection ALU 250 w hose Ø200/0,9m	20815464
	Top connection	20815564
" data-bbox="191 566 244 601"/>	Stack adaptor 5"/125 mm	20815664
	Stack adaptor 150mm/6"	20815764
" data-bbox="191 656 244 691"/>	Stack adaptor 7"/175 mm	20815864
	Rubber strip for 10m rail (2 x 10m strip)	20373427
	Rubber strip for 15m rail (2 x 15m strip)	20373429
	Rubber strip for 20m rail (2 x 20m strip)	20373431
