

FE 24/7 2.5

Mobile unit for continuous welding application and for one or two users. Fumes extracted directly at the torch.

The FE 24/7 2.5 is a mobile high vacuum unit designed to extract welding fumes in a continuous basis. Connected to a welding torch with integrated extraction, the FE 24/7 2.5 unit extracts the fumes directly at source for one or two welders. Automatic filter cleaning, side channel fans with high capacity and all special values that a Nederman product offers.

Upgrade with automatic start/stop function is available for user-friendly operation and improved energy efficiency.

The unit comes with 5m electric cable with CEE plug.

- Fumes are extracted efficiently during long shifts of welding thanks to the continuous run, efficient and maintenance-free side channel blower.
- Easy adjustment of air flow depending on application improves productivity and energy efficiency.
- Efficient and automatic filter cleaning assures long filter life for low operating cost.
- Integrated spark trap protects the FE 24/7 from sparks and minimizes the risk of damages to the filter cartridge.
- Filtered air can be re-circulated even when particulates are from high alloy steel. The unit is W3 approved (EN 15012).
